In most areas of the country, state or local law does not require that you buy a container to surround the casket in a grave. However, many cemeteries require that you have such a container so that the grave will not sink in. Either a grave liner or burial vault will satisfy these requirements.

Your Selection

As you select the vault for your loved one, you should consider several factors - the vault's material, design and personalization options - all guided by your preferences and those of your loved one.

The vault's construction is a major consideration, offering four levels of protection.

Premium -

High strength concrete, semi-precious, corrosive-resistance metals and high impact plastic combined for excellent durability.

Standard -

High Strength concrete, stainless steel and high impact combine for durable inner protection in a double reinforced vault.

Basic -

Single Reinforced vaults feature concrete construction strengthened with plastic for extra support.

Economy -

An unlined concrete grave box is also available.
